

Motor City Community Credit Union Joins Growing Digital Support Switch with Comm100 Live Chat & Chatbot

Industry	Credit Union
Headquarters	Ontario, Canada
Solution	Comm100 Live Chat & Chatbot
Comm100 Customer	Since 2021

The Results

Step one for Motor City was to set up Comm100 Live Chat so they could provide fast and convenient support to their members. During business hours, Motor City's agents respond in real-time to any member questions through live chat, helping them to improve member experience and engagement:

"Today's credit union members expect a great digital experience, so we knew we couldn't just rely on phone and email support anymore. It's also essential to offer live chat so you can meet members' support expectations and let them connect how they want to."

— Robert Griffith, Chief Executive Officer, Motor City Community Credit Union

With Comm100 Live Chat in place, Motor City is now enjoying an impressive average customer satisfaction score of 4.6 out of 5 and response time sits at just 30 seconds, with chat volume continuing to grow.

At first, Motor City was unsure how their members would receive live chat, but as Matthieu Hebert explains, members fully embraced live chat:

"All of our members love using live chat, regardless of age. We have been pleasantly surprised to find our older members embracing live chat, finding it easy to use and comfortable sharing personal information. Our chat volumes keep growing and, importantly, come back to use it again and again."

All credit unions need to build relationships with their members. While Motor City can achieve this with in-person

interactions, it can be more difficult with remote support. However, with live chat, Motor City's representatives have found it much easier to connect with members and build this rapport. Proactive chat is also helpful in conveying this caring and attentive image, as reps can send a chat invitation to members on their site who appear to need support. Representatives also use co-browsing to help them understand where the member is having trouble and personally guide them through the process, which members have reported to be *"incredibly helpful."*

Overall, the onboarding and training of Comm100 Live Chat was quick and smooth, with Motor City up and running within weeks. As Matthieu explained:

"The onboarding experience was great. The team at Comm100 was very responsive and ensured we had everything we needed, so the implementation was extremely smooth. The agent training was great too – Maria was fantastic and helped our representatives learn how to use the system very quickly."

Next Steps

The next step in their goal to improve member experience is to set up Comm100 Chatbot so they can offer 24/7 support. Chatbot is being launched in Q2 2022 as the team finishes building the chatbot and prepares for launch.

"Our experience with Comm100 has been fantastic, from sales to training and everything in between. Everyone is always so responsive and happy to help us, no matter the problem, no matter the time. I'm really looking forward to working with them far into the future and continuing to improve our member experience."

— Matthieu Hebert, Project Manager, Motor City
