

What would an extra  
**\$50,000**  
do for your department?

What would you do if you can  
**reach students 24/7** across  
multiple platforms?

Admissions engagement is  
**more increased**  
by immediate support by either  
an agent or a chatbot

How could you team benefit from  
**higher levels of**  
**student satisfaction?**

A yellow curved arrow icon pointing from the top right towards the bottom right, indicating a flow or connection between the top right question and the bottom right question.

Would an extra  
**20 hours a week**  
help prioritize more  
important tasks?

**Higher Education**

Development Manager

# Leveraging AI Automation - Problem

Growing expectations have exposed **gaps in service.**

Why is it **taking so long** to check my student status?

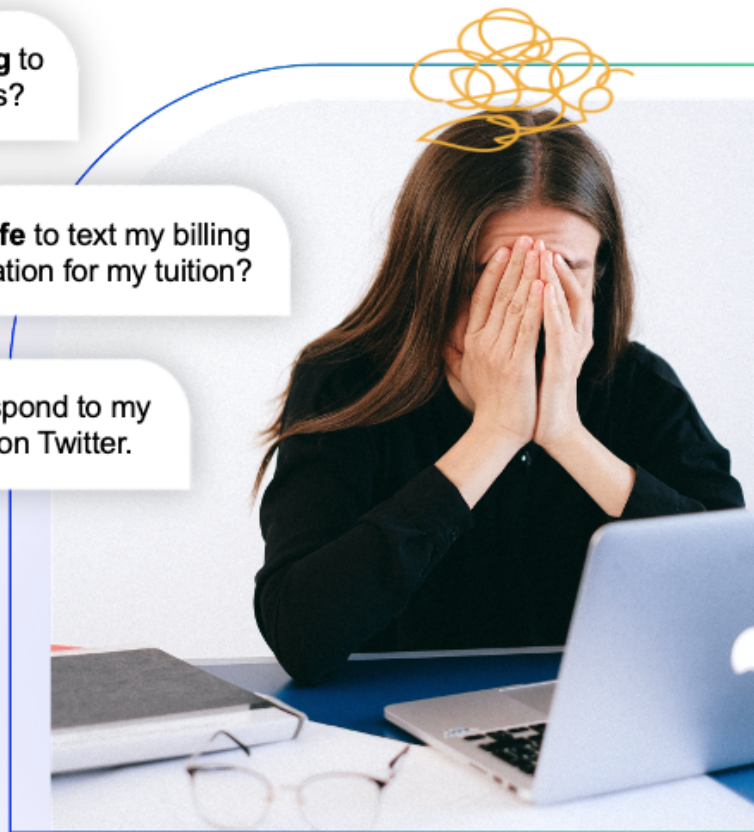

Is it **safe** to text my billing information for my tuition?

Please respond to my complaint on Twitter.

My classes are during the day so I can only respond in the **evening or on the weekend.**

Why is live chat only available on **weekdays**?

I sent my inquiry through text and **never got a response.**

# Leveraging AI Automation - Solution

## AI-Powered Automation

Scale reach and operations by using conversational AI to deploy chatbots and automation across channels

With our AI Platform, in just 2 weeks from now you will:

**Reach students who would never pick up the phone** – night owls, international students & weekend academics included

**Answer conversations across channels without losing the thread** – like being in more than one place at a time

**Triple volume of support your agents and handle** – with zero increase in human resources

**Reduce** support and service costs

**Improve** staff representative's effectiveness

**Easily** manage spikes in volume

**24/7** availability for students

# Goals

1. What are the advantages of the Comm100 NLP Engine?
2. What are the highlights of the Comm100 Chatbot?
3. How can you get more value from the Comm100 Chatbot?
4. Today's Demo - Comm100 University Chatbot

# Bots and Automation:

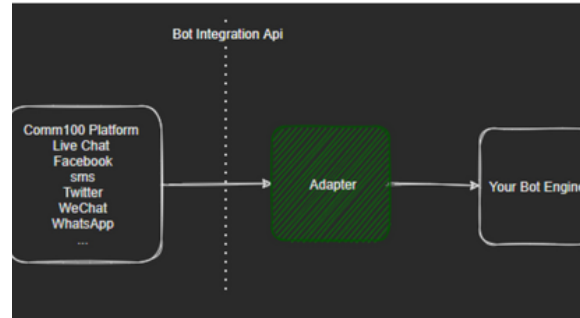

## What are the advantages of the Comm100 NLP Engine?

### NLP Engine

Uses advanced Natural Language Processing

Interprets a wide range of human expression, language, and grammar

Understands Conversational Dialogue - Including Spelling Mistakes!

### Bring Your Own Engine

Third-Party Chatbot deployment and management

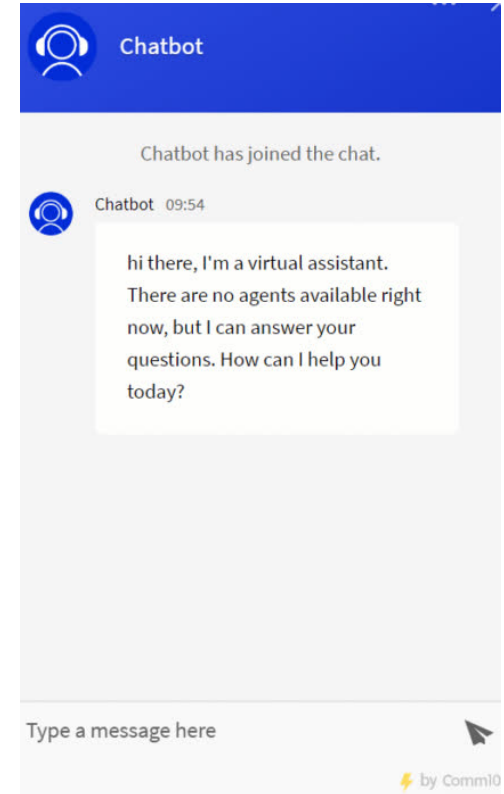

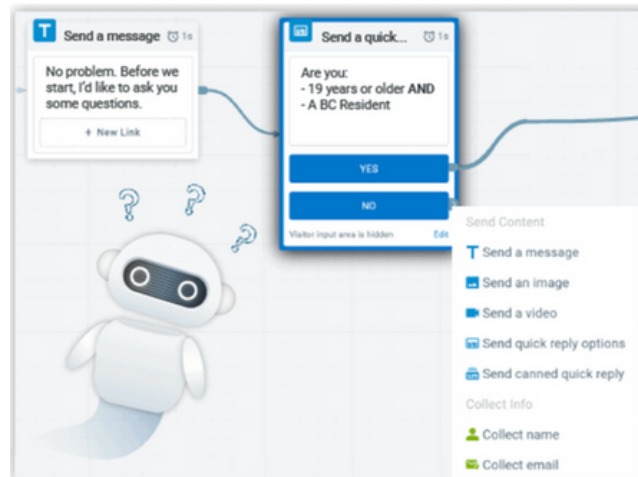

Construction capabilities with Third-party engines

Integration capabilities with third-party vendors

# Bots and Automation:

## What are the highlights of the Comm100 Chatbot?

- **Flow Builder**
  - Intuitive and Code-Free Bot Building Interface
- **Machine Learning**
  - Trains with real visitor questions, becoming smarter over time

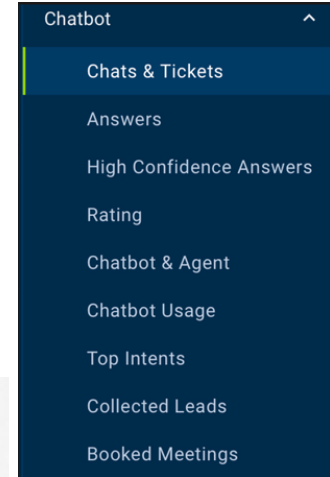

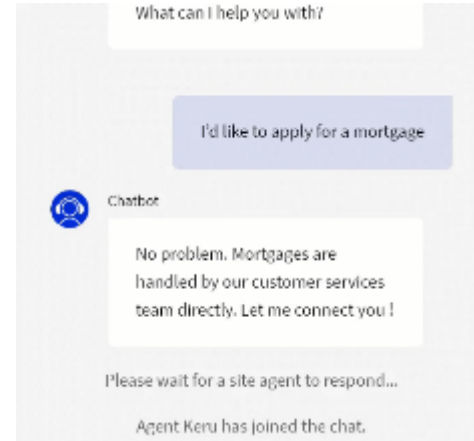

# Bots and Automation:

## What are the highlights of the Comm100 Chatbot?

- **Bot-Agent Cooperation**
  - Complete control on transferring to a Live Agent
- **Comprehensive Reporting**
  - Robust reporting suite to monitor and measure Chatbot performance
- **World-Class Capabilities, Easy setup and Maintenance**
  - Get your Chatbot Bot active within 30 minutes!

# Bots and Automation:

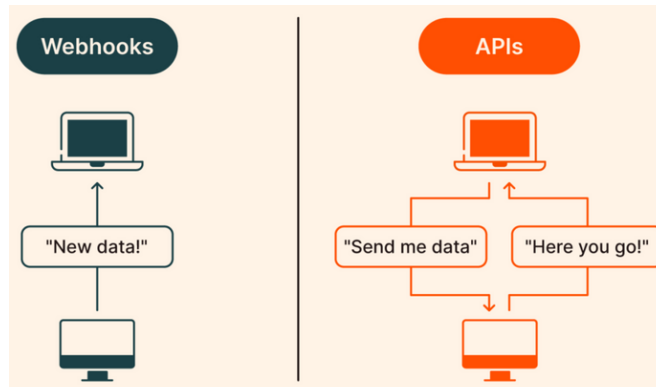

## How can you get more value from the Comm100 Chatbot?

### ✓ Webhooks

- Custom web callback query used to provide real-time information - Pushing or pulling data to your own system

### ✓ API Integrations

- Integrating with existing services/systems

The screenshot shows a web browser window with the Comm100 logo and the text 'Welcome to the Comm100 Demo Chatbot! Please fill out the following information to get started.' Below this, there are three input fields: 'Name' (with a red border and a red error message 'Name is required.'), 'Student Type' (a dropdown menu with '--Choose an option--' and a downward arrow), and 'Student Number' (with a red border and a red error message 'Student Number is required.'). At the bottom, there is a blue button labeled 'Start Chatting' and a small logo that says 'by Comm100'.

# Bots and Automation:

## How can you get more value from the Comm100 Chatbot?

### Custom Variables

- Uses HTML Document Object Model (DOM) or JavaScript variables to read your website's information

### Conditional Logic

- Feature used within a chatbot answer flow that changes the path a visitor will take based on information about them

**Edit Custom Variable**

Please work with your website developers to set up custom variables. Feel free to contact Comm100 if you need additional assistance.

Name \*  
Account ID

Type  
Integer

Value  
document.getElementById("id\_document")

The value of a custom variable can be the right hand side of a JavaScript Assignment Statement.

In Shopping Cart: Classic Shirt E34507  
Phone: Y334022  
Shopping cart total: \$356.99

Parts	Description
Multiple Branches	You can add multiple branches in a Conditions action. Each branch leads to a different branch. Each branch is checked in sequential order, and there is no limit to add these branches.
Multiple Conditions	You can add multiple conditions within a branch. These conditions can be combined by multiple "And" or "Or" or "Logical Expression".
Default Branch	You have <b>Any other condition</b> as a default branch on the Conditions card.

## **Bots and Automation:** Today's Demo - Comm100 University

# Training

Tried and Trusted Methods - We know what we're doing!

SUPPORTING STUDENTS AT TOP INSTITUTIONS

"10/10 training, can't say much more than that!  
Well structured, thorough, prompt follow up and  
the right amount of time. Well done, Maria!"

— Previous training attendee (University Department Director)

*95% CSat Rate from 150+ Live Training Sessions across  
the Comm100 platform*

"I really appreciate how responsive and helpful  
Maria was during the process, providing  
additional resources, use cases and best practice  
recommendations. She ensured the process was  
streamlined and straightforward."

— Previous training attendee (Marketing Manager)

"Maria was very helpful in pointing out things for  
us to consider which we did not think of initially.  
It's great to draw on the trainer's experience with  
other users."

— Previous training attendee (Lead Project Manager)
